

# Sunshine Coast Airport Expansion Project

## TO THE HOUSEHOLDER

**Sunshine Coast Council's Airport Expansion Project is progressing well and remains on target for completion by the end of 2020 as scheduled.**

The detailed airspace and flight path design for the new runway at the Sunshine Coast Airport is now being finalised.

From Wednesday 20 March 2019 over the course of six weeks, Sunshine Coast Council, Airservices Australia and the Sunshine Coast Airport, will conduct information sessions and briefings to present the proposed airspace and flight path designs.

The community is invited to participate in this communication and engagement process.

In finalising the airspace and flight path design for the new runway, we have taken into account safety, efficiency, regulatory and environmental constraints and a range of stakeholder considerations, including minimising the effect of aircraft noise on local communities, wherever practicable.

An analysis on the flight paths and airspace design indicates that there will be minimal change to the information originally included in the Environmental Impact Statement (EIS) consultation process conducted in 2014 and 2015.

We are committed to communicating and engaging with all stakeholders on the new runway flight paths and airspace architecture. This communication and engagement process provides an opportunity for a more detailed look at how the airspace will operate once the new runway is in service, to answer any questions that you may have and for members of the community to provide feedback on the proposed airspace design.

Engagement activities include:
